

BemTrain

The BemTrain program provides a range of value adding facilities for BMX and other cycling disciplines using transponder systems.

Facilities

- A Training and Coaching aid providing Split Time Reporting from up to 10 timelines. This facility can provide live data from a Training Session or Race Meeting or be run at a later time by importing the passing records. Reports available in an Excel file for detailed analysis or in HTML format or uploaded to the SportsLists Phone App (subscription required) every few minutes during the Training Session. The session can be configured for gate start or first loop start and caters for multiple loops on the one decoder.
- For velodrome or speed skating, a Pursuit training report in Excel or HTML format that shows the leader at each timing point, the gap to following team participants, lap times, half lap splits, cumulative lap times, individual sector times and cumulative time at each sector.
- A transponder Fitting Station for verification that the correct transponder is fitted to the correct bike.
- A Track Monitor application for use during practice to check for competitors with an unregistered transponder, identifying riders without or with a faulty or expired transponder subscription and riders practicing outside of their specified session. As an aid to identifying faulty or expired subscription transponders when the event is being scored with the BEM program, a report can be generated that identifies competitors in the BEM event whose transponder has not been seen during practice.
- A real time Scoreboard for commentary, public display or staging check operating in one of the following modes.
 - Time Trial scoreboard with selectable display options:
 - Three fastest times and split times with relative placing in the class for the latest competitor to cross the first, intermediate and finish line loops.
 - Five fastest times.
 - Qualification mode from single runs or multiple laps showing the top 8 qualifiers plus the last 8 completed laps. (P)
 - Pump Track specific scoreboard displays with tailored displays for each of the event formats:
 - Solo Run (P)
 - Pursuit / Head to Head Single. (P)
 - Head to Head Dual. (P)
 - Multi Lap Race with lap count and cumulative times. (P)

- Race Progress mode for a single race with the scoreboard progressively updated as riders cross each timeline.
 - Race Lap Time, showing lap times and placings for each race. Allows for multiple races on the track and multiple loops on the one decoder.
 - Single timeline showing gaps between passings.
 - Two timelines independently showing gaps between passings.
 - Lap time display mode showing the last 8 or 16 completed lap times.
 - Staging Check moto to validate transponder fitting and operation.
- May be used stand alone or in association with the BEM Race program.
- Features flagged with **P** are available in the Premium version of BemTrain.

Split Time Training

Live Split Time screen below with data from a BMXA HPP training session at the Sleeman Sports Complex.

Note: data can be displayed by Start Time, Reverse Start Time, by Rider or by any of the active timelines.

The screenshot shows the BemTrain software interface. The main window displays a table titled "Session Run Time Splits" with the following columns: Ref, Transponder, Name, Date, Start Time, Loop 1, Loop 2, Loop 3, Loop 4, Loop 5, Loop 6, Loop 7, Loop 8, Loop 9, Loop 10, and Status. The table lists 30 riders with their respective transponder numbers and names, along with their start times and lap times for each of the 10 loops. Below the table, there are several control panels: "Passing Records" (showing 9762 passes), "Session Display and Sort Options" (with radio buttons for Start Time, Reverse Start Time, and Sort by Rider), "HTML Auto Reports" (with checkboxes for Create during capture, Upload to SportsLists App, and Scroll), and a "Refresh" button. At the bottom, there is a "Delete Run Time Records" button and an "Exit" button.

Example below of a BemTrain generated Excel report showing elapsed time to each timing point and sector times between timing points.

Transponder Fitting Station

Display of competitor data can be based on the content of the passing records or by reference to a BEM Event File which is recommended when the BEM program is to be used for scoring the event.

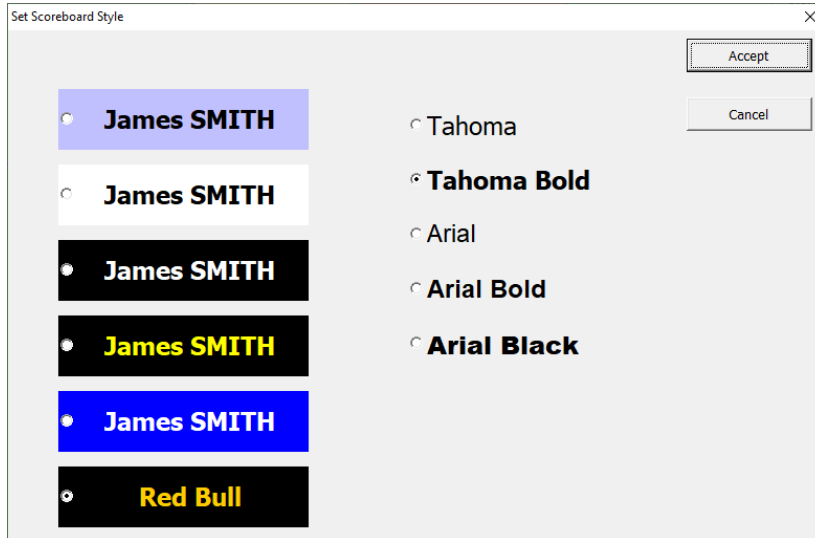

Fitting Station screenshot (below) using a BEM event file to source the competitor details from the transponder number.

NAME	CLASS	RACE NUMBER	TRANSPONDER LABEL
Kye AFFOO	13 year Boys	10	P1
Kye AFFOO	13-14 year Boys Cruiser	6Q	P1
Kye AFFOO	PRE 13 year Boys	10	P1
-	-	-	-
-	-	-	-
-	-	-	-
-	-	-	-

Scoreboard Styles

A variety of foreground, background and fonts can be selected by the operator to optimise the display for the particular environment. E.g. high contrast such as yellow on black for outdoors.

Time Trial Scoreboard

In Time Trial mode with the top 3 option, the scoreboard shows the top three in the class at the top of the screen and the latest finisher at the bottom of the screen.

- Display starts when the first rider crosses the first loop.
- Optional auto reset and clear at class change.
- Supports concurrent riders on the track.
- New leader at any of the three (max) timing points highlighted in green in the Last Completed area.

Men Elite		
Sloan Ranger	43.444	1
Jack Sprat	44.145	2
Fred Flintstone	44.461	3
--- Latest Run ---		
George Jetson	21.251	1 Half
Pedro Picapiedra	46.333	5 Finish

Latest competitor has the fastest time at the Half track timing point.

Latest competitor to cross the Finish line is placed 5th in the class

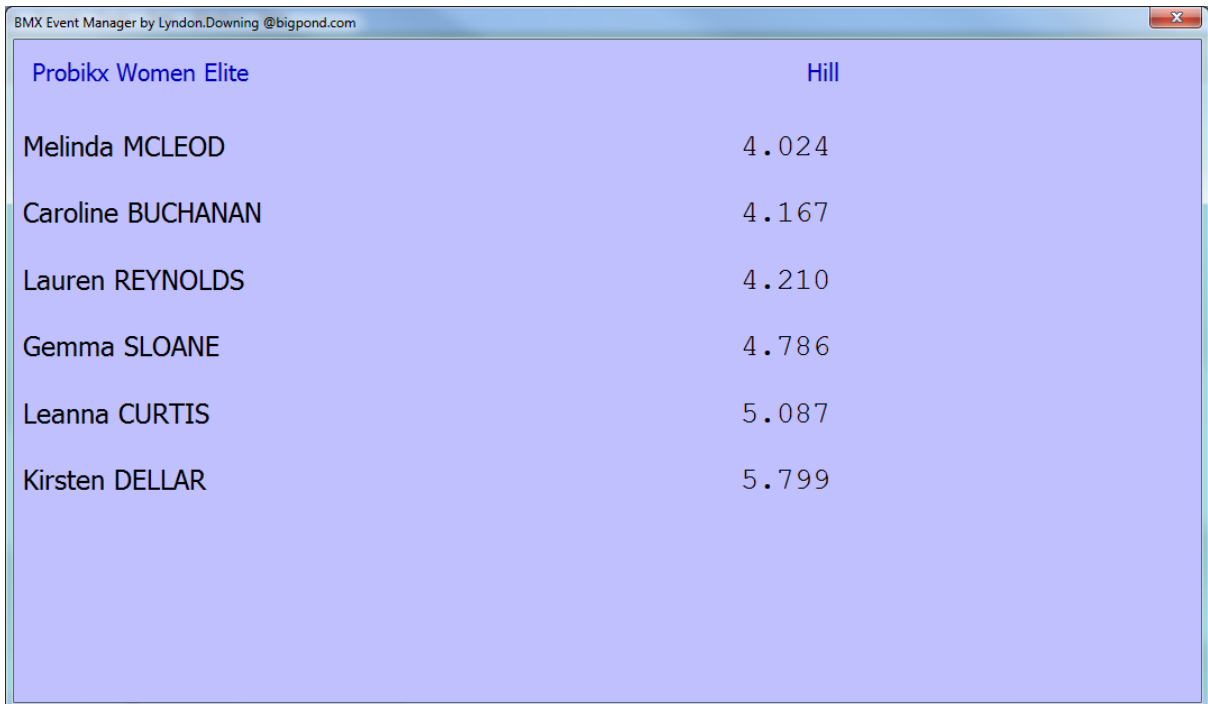

Lap Race Scoreboard

In this mode, the Scoreboard displays a single lap race with progressive updates from intermediate timelines.

- Display starts when the first rider crosses the first timeline.
- Display time for intermediate timelines can be set by an auto-clear timer or cleared when the first rider crosses the next timeline in the run.
- Finish results displayed until cleared by the operator.
- Race must be complete before the following race is started.

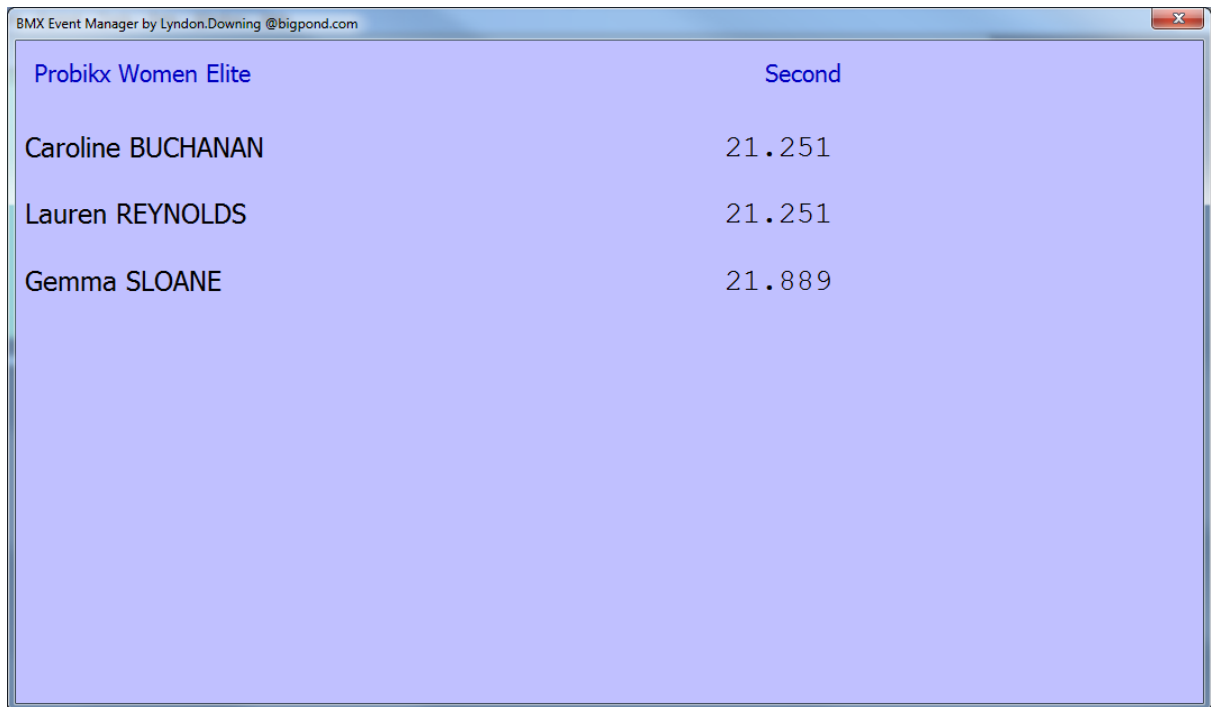

After riders have crossed the bottom of the Start Hill loop.

Probikx Women Elite	Hill
Melinda MCLEOD	4.024
Caroline BUCHANAN	4.167
Lauren REYNOLDS	4.210
Gemma SLOANE	4.786
Leanna CURTIS	5.087
Kirsten DELLAR	5.799

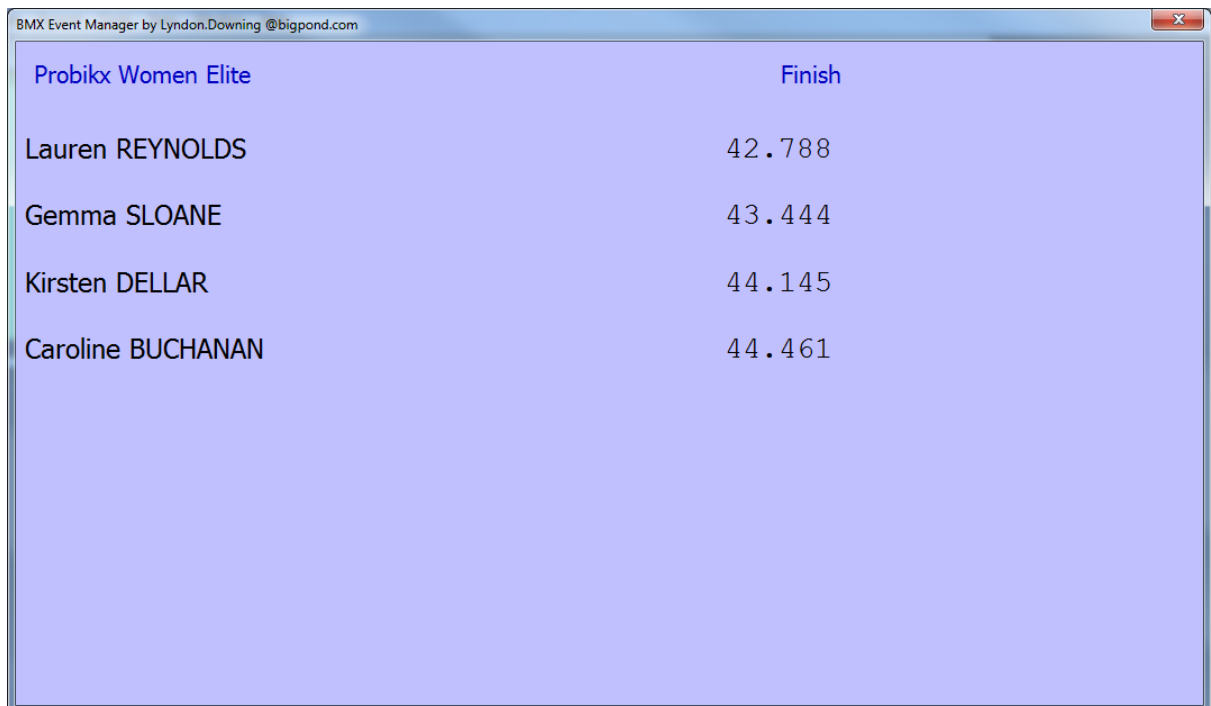

Scoreboard update after first three riders have crossed the Second straight loop.

Probikx Women Elite	Second
Caroline BUCHANAN	21.251
Lauren REYNOLDS	21.251
Gemma SLOANE	21.889

Subsequent updated after first four riders have crossed the Finish loop.

Probikx Women Elite	Finish
Lauren REYNOLDS	42.788
Gemma SLOANE	43.444
Kirsten DELLAR	44.145
Caroline BUCHANAN	44.461

Single Loop Scoreboard

The scoreboard in this mode shows passing order from a single loop with gaps shown between the riders. An auto clear timer can be applied, typically when this display mode is used for commentary purposes.

- Display starts when the first rider crosses the timeline.
- Timer controlled or manual display clearing.
- Photo finish gap setting when displaying the Finish Line.

Example of Finish Line display with Photo Finish active.

	Finish Line	GAP	
MAS	Eddyne Nasuhar ZAINAL ABIDIN	+0.000	
GBR	Lena FISCHER	Photo	
AUS	Maggie ALEXANDER	Photo	
THA	Chutikan KITWANITSATHIAN	+5.998	

Twin Loop Scoreboard

In this mode the display shows passings from two loops with gaps shown between the riders with each loop an autonomous display. An auto clear timer can be applied, typically when this display mode is used for commentary purposes.

- Each display starts when the first rider crosses the timeline.
- Timer controlled or manual display clearing.
- Photo finish gap setting when displaying the Finish Line.

Example of twin loop display from First Corner and Finish Line

First Corner		Finish Line	
Rider Name	GAP	Rider Name	GAP
Indiana HENRIQUES CLIFTON	+0.000	Ellie ABBOTT	+0.000
Brook JASPER	+0.063	Lena FISCHER	+1.261
Gemma-Lee THOMPSON	+0.962	Eddyna Nasuhar ZAINAL ABIDIN	+3.347
Chutikan KITWANITSATHIAN	+1.023	Maggie ALEXANDER	+4.341

Lap Time Display Scoreboard

In this mode the operator can select to display the last 8 or 16 completed lap times in real time. Typical use of this display mode is for a rider information screen for a race meeting, practice or coaching session.

Latest Finish (1-8)			Latest Finish (9-16)		
Rider Name	Lap Time	TOD	Rider Name	Lap Time	TOD
DE NYS Adam	36.075	15:13:10	CALLAN Joshua	35.515	15:10:33

CAIRNS Max	36.453	15:10:34	CONNORS Kerrod	22.038	15:09:11
BIAS Michael	36.297	15:10:34	FRANKS Daniel	20.614	15:09:10

Track Monitor

The Track Monitor application is designed for use during practice to check for competitors with an unregistered transponder or practicing outside of their specified session. The setup can use from 1 to 10 individual timelines

- Up to 10 timelines can be monitored to easily track any unassigned transponder around the track or at a transponder test station.
- Each unassigned detection gives and audio alert to the operator.
- When used as a BEM Event File as the name reference, a summary report can be generated showing transponders detected on the track that are not in the BEM Event and a list of riders in the BEM Event with no detected transponder passings.
- The ability to create a Transponder Registration BEM Event file for use with the BEM Scoring program to update the registration status for riders who have a detected transponder passing.
- Assigned and not assigned transponders shown in separate panes.

Sample display:

The screenshot shows the Track Monitor application window. It features two main data tables and a control panel at the bottom.
