CTT Novice BMX Timing System

For a BMX Transponder Timing System, we are able to supply a timing system together with software that allows all the on the gate to be timed at the same time.
The system includes both Hardware and Software
The CTT Novice BMX Timing System includes one MyLaps Decoder, gate pulse collector, 3 timing loops (timelines), the needed connection boxes and coax cabling (1x 50m; 1x 30,m; 1x 20m or alternatively 1x 100m roll), CTT Server with software and a track access point.
Specific training session can be set up by the coach and then selected. Some training session

1. Hardware
    We supply a Transponder Timing System from MyLaps. MyLaps is still the market leader in transponder timing devices and is trusted at Olympic level.
    We supply the following:
    a. MyLaps ProChip desktop Decoder
   The Decoder is small and lightweight.

b. MyLaps ProChip Timing Loop x 3
   The Timing Loop can be built into an existing track or placed during the track build.

c. Local server with Software together with an access point for a local intranet network.
   The server has the **Chip Time Trainer** software preinstalled and requires no keyboard, mouse or screen. It operates via the local intranet on any mobile device with a browser.

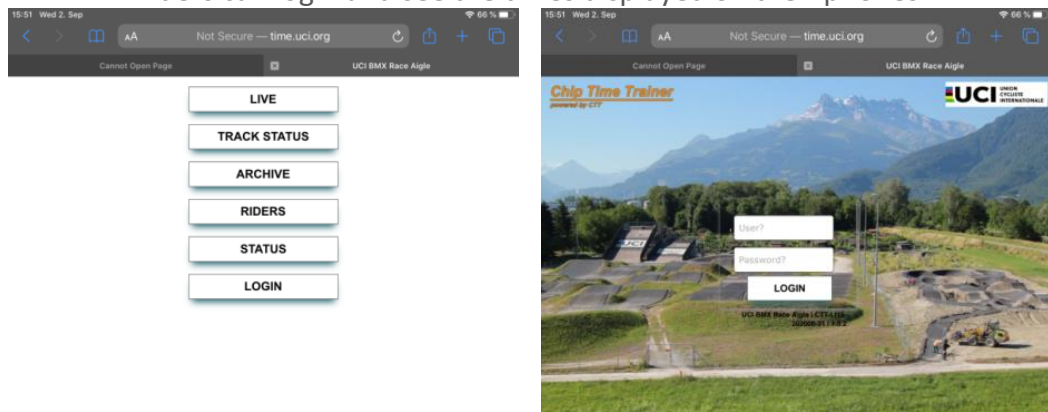

d. An Access point is also supplied in order to create a local intranet with a radius of ±300m.
e. We also supply all cabling required to complete the installation (an installation instruction manual is also available)
f. Rasberry Pi display extender can also be supplied in order to display the times on any type of screen/monitor.

2. Software
    a. Chip Time Training software is preloaded onto the server and personalised for each track.
    b. Via the local intranet, the software is accessible and all functions can be used.

    c. Different levels of authentication are available in order to allow track owners/operators access to set-up different configurations within the software. Riders can login and see the times displayed on their phones.

d. For BMX, there are a number of different scoreboard displays available depending on the training session or personal requirements:
